PROJECTS

MaNa CaseMaster:

[GitHub](#) [Live](#)

I developed MaNaCaseMaster, a text conversion tool using HTML, CSS, JavaScript, and React, showcasing my proficiency in front-end development skills. With MaNaCaseMaster, users can effortlessly convert text between various cases. I leverage my expertise in HTML, CSS, React, and JavaScript to create an intuitive and visually appealing interface.

Ecommerce (MERN Project):

[GitHub](#)

Built an e-commerce application using the MERN (MongoDB, Express, React, Node.js) stack. Leveraged MongoDB as the database for storing product information, user details, and order data. Implemented a robust backend using Node.js and Express, handling user authentication, product management, cart functionality, and order processing. Developed a dynamic and responsive frontend using React, incorporating features such as product listing, search functionality, user authentication, and shopping cart management. Demonstrated proficiency in full-stack development, utilizing the MERN stack to create a seamless and engaging e-commerce experience.

Al Quran Web app:

[GitHub](#) [Live](#)

I have developed a captivating Al Quran website with convenient access, English translation, and explanation. Users can freely browse diverse Surahs without an account. It's responsive, offers dark mode, and built with JavaScript, React, Bootstrap.

Backend System Employee Hiring:

[GitHub](#)

Built a robust hiring platform backend using Node.js, MongoDB, Express, and Postman. Implemented CRUD operations for companies, jobs, applications, and students. Seamlessly manage profiles, listings, applications, and student info. Demonstrates expertise in backend development and database integration.

Todo webApp:

[GitHub](#) [Live](#)

MaNaTodo is a responsive to-do app created with HTML, CSS, JavaScript, Bootstrap, React.js, and React-Toastify. It allows users to add, edit, complete, and delete tasks, with data stored in local storage for persistent use. Showcasing strong front-end development skills, MaNaTodo offers a user-friendly interface and intuitive design.
